

WELCOME FROM THE DISTRICT ADMINISTRATOR

Welcome to the Williams Bay School District. The Village of Williams Bay lies on the shores of beautiful Geneva Lake. A “Village of Learning,” it is the home of Yerkes Observatory, George Williams College, and the Williams Bay School District.

The students, faculty, staff, and community take pride in our schools. We are a unique school district, offering a plethora of academic and co-curricular opportunities while still maintaining a very personalized, small school atmosphere. We believe that a sense of belonging and a feeling that students and parents are connected to their school are critical to student achievement.

The achievement in our schools is exceptional. During the 2010-11 school year, the Williams Bay average ACT score was higher than any other high school in Walworth County. We also had the highest percentage of students taking the test. The performance of our elementary school students on standardized tests is also outstanding. One hundred percent of the seventh grade students in 2010-11, for example, scored at the proficient or advanced levels in reading on the WKCE test.

The Association of Wisconsin School Administrators (AWSA) has recognized the Williams Bay Junior High School as an Exemplary Middle School. Our school was recognized for achieving math scores in the top ten percent and experiencing significant growth in math.

The Williams Bay School community believes that our academic, athletic, and arts programs are all very important. We offer a wide range of opportunities to meet the varied needs and interests of our students. Our tradition of excellence makes Williams Bay a vibrant learning community.

I would invite you to visit our schools or contact any staff member for more information. I am certain that you will be impressed with our students, staff and educational opportunities.

With pride and respect,

Dr. Vance A. Dalzin
District Administrator
